

CALL TO ACTION

BE ON NOTICE FOR THE NEXT PILGRIM SHUTDOWN

Marked as one of the worst operating reactors in the USA, Pilgrim is an ongoing threat to our families and communities.

We will **not** tolerate equipment failures and scrams!

“Entergy did **not** implement the process of planning, controlling, and executing work activities such that nuclear safety is the overriding priority.” – NRC, 2/14/17

Governor Baker must speak up for the people of Massachusetts and call for immediate closure of Pilgrim Nuclear Power Station.

BE ON NOTICE TO ATTEND

At the next shutdown, the next business day, we will gather with signs, banners, and noisemakers at the **MA State House, Beacon Street entrance, 1:00 PM.**
